

Looking for new school Buildings ? We have the answers...

School Building Specification

- 180mm sips walls to a Uvalue of 0.15 with BBA Certification for minimum life expectancy of 60 years
- Timber insulated cassette floors and roof with ply deck to finish
- 89mm internal stud partitions with acoustic fibre insulation
- Plaster and paint internal finishes
- Half hour fire-check doors and frames internally
- Lightweight external render, timber or panelised cladding systems

- Rational composite timber windows and doors with Aluminium capping externally
- Contemporary modern design specification
- Fibreglass durable roofing with guarantees
- Inbound gutter detailing
- Standardised lighting, electrics and heating

- Off-site manufactured for minimal site times, erected on pads or a plinth installed by others
- Upgradeable specification
- Thermally efficient and airtight for MVHR installation
- Window location options to suit different site layouts

Our SIPS built classrooms or staff rooms offer a rapid build system, providing super efficient insulated warm space for children to study, learn and play in, that will last for decades. Inspired modern construction methods offer long term solutions with minimal maintenance, for your staff, your pupils and your school.

Please contact us to discuss your school's requirements and we will be happy to chat through options and costs.
